

NITZAN RABINOWITZ

Personal

Name: Nitzan Rabinowitz
Birth date: January 8, 1949
Citizenship: Israeli
Marital Status: Married + 1

Academic Education

1975 B.Sc. degree in mathematics, Ben-Gurion University, Israel.
1988 Ph.D in seismology, Seismological Department, Uppsala University, Sweden.
Thesis on: 'Some aspects of statistical uncertainties in earthquake location and seismic hazard estimation.'

Employment

1976-1980 Military service in the IDF. Among other positions working at the System Analysis Center in the field of operational research.
rank: Captain.
1980-1981 Teaching mathematics in High school.
1981- 2001 Researcher at the Seismological Division, The Geophysical Institute of Israel (GII).
2001 -2003 CTO, Moonlight Cordless Ltd.

Professional Activities

1989 Visiting lecturer at the Department of Geophysics and Planetary Sciences, Tel Aviv University.

1989 Guest Lecturer in a training course in Guatemala City on seismic risk assessment for civil engineers from six Central American countries, organized by the " Center of Coordination for Prevention of Natural Disasters in Central America."

1991 Leading an international project, funded by the Agency for International Development (USA/AID) to guide a scientific group of Central American and Israeli scientists to carry out in Central America a three years scientific work entitled:

" Earthquake monitoring and seismic hazard assessment in Central America" project id: c11-229.

1992 Awarded (as Israeli PI) a three years research grant jointly with Dr. M. Joswig from Aachen university, Germany, from the German Israel Foundation for Scientific Research and Development (GIF), to conduct a joint research project entitled :

" Detection Localization And Identification Of Local Seismic Events By A Small Array In Israel " (project id: I 123-310.02/91.)

1993 Guest Lecturer at the Universidad Nacional , Heredia, Costa Rica.

1993 Organizing and conducting in Costa Rica, a regional seminar for participants from six central American countries, devoted to modern methods in seismic hazard assessments. The seminar was held at the School

of Geology, University of Costa Rica, Costa Rica (March 1993.)

1995 Guest Lecturer in Guatemala City, teaching a month course addressing topics in Statistical Seismology , financed by the Swedish Agency for Interantional Development (SAREC). The course was attended by seismologists from the 6 central american countries.

1996 Active participant in the GSE (Group of Scientific Experts) form, in Geneva, in the framework of the GSTT3 seismic experiment.

1996-1998 Expert Adviser for the Israeli delegation for the negotiations of the Comprehensive Test Ban Treaty (CTBT).

1996-1998 Research Seismologist, National Data Center, Nuclear Research Center, Yavne, Israel.

1998 Initiating and organizing of a first international workshop devoted on "High precision "Earthquake Location and Seismic Tomography", January 1998, Dead Sea , Israel .

1999 Organizing of a second international workshop on "3-D Velocity Structure and Accurate Earthquake Location", Platres, Cyprus, July 1999.

2000 Initiating and organizing a joint workshop with USGS experts, funded by the US-Israel Binational Science Foundation - BSF, devoted to "Reevaluation of the Seismic Hazard to Israel", Lod , Israel , May 2000.

2001 –2003 Running the algorithm group of "Moonlight Cordless Ltd", Israeli private company. Actively involved in developing unique algorithmic solutions for video compression.
